

READ

A key aspect of this trial is understanding how useful physicians (Attendings and Fellows) find the Extubation Advisor (EA) Report in extubation decision-making.

To demonstrate the effect of the EA report in patients randomized to the EA arm, the extubating physician (Attending or Fellow) should review the EA report provided after each SBT and complete the MD Questionnaire.

We've created the following acronym, **READ**, to provide guidance in this process:

R	REVIEW (THE EXTUBATION ADVISOR REPORT)
E	EVALUATE (THE DATA PRESENTED AND THE PATIENT)
A	ACTION (DECIDE - PROCEED WITH EXTUBATION OR NOT?)
D	DOCUMENT (MD QUESTIONNAIRE)
